What action should the administrator use in the rule?

- A. Ignore Session
- B. ignore S-TAP Session
- C. ignore SQL per Session
- D. ignore Responses per Session

Answer: B

NO.2 In a centrally managed environment, while executing the report 'Enterprise Buffer Usage Monitor', a Guardium administrator gets an empty report. Why is the report empty?

- A. Sniffers are not running on the Collectors.
- B. The report is not executed with a remote source on the Collector.
- C. The report is not executed with a remote source on the Aggregator.
- D. Correct custom table upload is not scheduled on the Central Manager.

Answer: C

NO.3 During a Guardium deployment planning meeting, a database administrator indicated that the mission critical databases were clustered. How should the Guardium administrator handle S-TAP installation and configuration with respect to clustered databases?

- A. Install S-TAP agents on all active nodes. Set ALL_CAN_CONTROL=1 to failover the STAP process to the passive nodes when a database failover occurs.
- B. install S-TAP agents on all active nodes Set WAIT_FOR_DB_EXEC=-1 to set the agent process to failover to the passive node when a database failover occurs.
- C. Install S-TAP agents on all active and passive nodes. Set ALL_CAN_CONTROL=0 to disable all passive nodes until a database failover occurs.
- D. Install S-TAP agents on all active and passive nodes: Set WAIT_FOR_DB_EXEC>0 on all nodes to start S-TAP processes without waiting for a correct DB home.

Answer: A

NO.4 An administrator manages a Guardium environment including 4 Collectors exporting data to an Aggregator. A Session report is run on the Aggregator at noon EST for data from the last day.

Which of the following will ensure there is data in the report?

- A. Schedule Data Purge on the Aggregator to run every day after 5 am EST.
- B. Schedule Data Import on the Aggregator to run at any time of the day.
- C. Schedule Data Import in the Aggregator to run every day before 2 am EST.
- D. Schedule Data Import on the Aggregator to run every day at 6 am EST or later.

Answer: C

firewall_timeout=10
```

A Guardium administrator applies a policy to the Collector with two rules as below. The actions of the rules have been hidden.

Rule 1:

Record Rule Description	Cat.	Classif.	Sev.	Client IP	Client Host Name	Server IP	Server Host Name	Sec App.	DB Name	DB User	App. User	Client IP/Sec App./DB User/Server IP/Sec. Name
