High-praise Exam Dumps Questions grant you success by high pass rate - ITPassLeader

Exam : **S2000-018**

Title : IBM Cloud for VMware v1
Specialty

Vendor : IBM

Version : DEMO

NO.1 Which of the following services is required for VMware for Regulated Workloads?

- A. Continuous integration/continuous deployment pipelines
- B. Advanced network isolation and encryption
- C. Autonomous resource scaling
- D. Regular vulnerability scanning and assessment

Answer: B

NO.2 Regarding VMware security compliance, which features are vital for maintaining a robust security posture?

- A. Isolation of network traffic between different organizational units.
- B. Integration with legacy encryption protocols for backward compatibility.
- C. The ability to define and enforce security policies across VMware workloads.
- D. Regular snapshots of virtual machines for point-in-time recovery.

Answer: AC

NO.3 What factor is essential when considering server host requirements for any VMware solution on IBM Cloud?

- A. The need for physical access to the server by the cloud customer.
- B. Implementing a uniform server configuration across all cloud environments.
- C. Compatibility with IBM Cloud's native Kubernetes service for orchestration.
- D. Ensuring the server meets VMware's compatibility guide and IBM Cloud standards.

Answer: D

NO.4 What are essential elements to design a migration strategy for VMware environments to IBM Cloud?

- A. Assessing VMware on-premises versions for compatibility with IBM Cloud.
- B. Ensuring that the migration strategy includes a robust rollback plan.
- C. Planning for network connectivity to remain unchanged post-migration.
- D. Identifying workloads that require redesign before migration.

Answer: AB

NO.5 How does IBM Cloud support the resiliency of VMware workloads?

- A. By providing satellite locations
- B. Through multi-zone regions
- C. With dedicated gaming servers
- D. Using blockchain technology

Answer: B

NO.6 What functionalities does HyTrust CloudControl offer for VMware environments?

- A. Enabling multi-factor authentication for access to virtual machines.
- B. Automated network configuration across VMware deployments.
- C. Policy enforcement for access control and data sovereignty.
- D. Detailed logging of all administrative actions within the VMware environment.

Answer: ACD

NO.7 Which describes the benefits of IBM Cloud Bare Metal Servers for Virtual Private Cloud (VPC)?

- A.** Bare metal servers for VPC have a wide variety of customizable options that give the client a platform for high performance workloads with the same network performance of traditional VPC servers
- B.** Bare metal servers for VPC have a wide variety of customizable options that give the client a platform for high performance workloads with up to 4x network performance of traditional VPC servers
- C.** Bare metal servers for VPC have preset profiles that give the client a platform for high performance workloads with the same network performance of traditional VPC servers
- D.** Bare metal servers for VPC have preset profiles that give the client a platform for high performance workloads with up to 4x network performance of traditional VPC servers

Answer: D

NO.8 What is a key consideration when designing storage solutions for VMware in IBM Cloud?

- A.** Maximum data locality
- B.** Blockchain integration
- C.** Quantum computing compatibility
- D.** Data resiliency

Answer: D
